**Yuri Ustinov**
Full remote

**Subject:** Application for QA Engineer Position

As a QA Engineer with 5+ years of experience testing web/mobile applications and high-load systems, I've developed a proven ability to identify critical issues before they impact users. My approach combines technical expertise with process optimization to deliver measurable quality improvements.

**Key Qualifications:**

✔ **End-to-End Testing Leadership**
- Designed test strategies covering 95% of functional requirements for e-commerce platforms
- Reduced regression testing time by 40% through optimized test case management
- Identified 500+ critical bugs pre-production through systematic API testing

✔ **Technical Excellence**
- REST/SOAP API validation (Postman, Swagger)
- Cross-browser/device testing (BrowserStack)
- SQL/NoSQL database verification
- CI/CD integration (Jenkins, GitLab CI)

✔ **Process Improvement**
- Implemented bug classification system that accelerated fixes by 2x
- Created onboarding documentation reducing new hire ramp-up time by 200%
- Established QA best practices across 4+ product teams

**Why I'm Excited About:**
Quality assurance is my passion, and I'm eager to bring my meticulous approach to your team. With extensive experience in manual testing across web, mobile, and API platforms, I specialize in identifying critical issues before they impact users.
What excites me most is the opportunity to:
- Implement comprehensive test strategies that uncover hidden defects
- Optimize QA processes to improve product reliability
- Collaborate with cross-functional teams to elevate quality standards

My strength lies in combining analytical thinking with deep system knowledge to ensure thorough test coverage. I take pride in delivering products that meet both technical requirements and user expectations.
I would welcome the chance to discuss how my expertise in functional, regression, and integration testing can contribute to your quality goals. Available for an interview at your earliest convenience.
